

Adelski Dissertation Research Award

The Adelski Dissertation Research Award supports PhD students **who have submitted external dissertation funding proposals and passed their qualifying exams**. The award provides \$3000 in "bridge" funding to enable students to begin their dissertation fieldwork immediately. The funds can only be used for approved dissertation fieldwork expenses (e.g., travel expenses, food, and housing) and the money must be spent in full by the end of the current fiscal year (June 30, 2022). Students must be prepared to begin their on-site dissertation research as soon as possible, but no later than May 15, 2022 to receive this award.

How to Apply

Interested students should work with their advisor to submit a SINGLE PDF by February 14, 2022 that includes the following materials to DGS Kristin Monroe (kristin.monroe@uky.edu) AND Department Manager Cathy Bowers (cathy.bowers@uky.edu):

- A cover letter that includes the following information:
 - ✓ A clear statement of 1-2 pages describing what the student will accomplish with the funding, including details on when and where the research will take place and what activities it will include.
 - ✓ A proposed budget for the \$3000.
 - ✓ A summary of dissertation research funding proposals submitted to date.
 - ✓ A proposed timeline for dissertation research, data analysis, and write-up (including a proposed defense date).
- A copy of a submitted Research Proposal, such as NSF, NEH, Wenner-Gren, NIMH, etc. (including proposed budget)
- A current CV

AND

- **Advisors should separately email a supporting letter to the DGS Kristin Monroe by deadline**. The letter should speak to the feasibility of the student's research plans and attest to the fact that the student has indeed submitted external funding proposals and successfully passed their qualifying exams.

Please note: students who have qualifying exams scheduled for the Spring 2022 semester and can demonstrate that they will be able to use the research funds by the end of the fiscal year may apply and will potentially receive the Adelski Research Award contingent on their having successfully passed their exams by the end of the spring semester.
